SUMMARY

I am a web developer that has recently graduated from General Assembly's Web Development Immersive course. During my time at General Assembly I was taught multiple frameworks such as MEAN stack and Ruby on Rails, which has enabled me to work proficiently as a full stack web developer. Having my roots beginning with farming and my first steps in my career in music I have come to find that tech is my passion and the next step I want to take in my career. I believe that my past experience and musical skill is very transferable by knowing the characteristics of patience and hard laborious work. I am currently working on my Recipe Collective web app and implementing the Ionic framework to make it suitable for mobile app stores.

TECHNICAL SKILLS

HTML | CSS | JavaScript | jQuery | MongoDB | Express | Angular | Node | SQL | PostgreSQL | Ruby on Rails | Github | Bootstrap

PROJECTS - ONE WEEK AGILE SPRINTS

Recipe Collective - MongoDB | NodeJS | Express | Angular | JWTs - I intentionally created this website to get familiar with consuming third party API's. Coordinating with a classmate, I was able to display recipes on my site that he created on his. Doing this and using JavaScript Web Tokens for authentications, this project was a valuable experience for me.

Gossip Hollywood - Ruby | Rails | PostgreSQL - I made this app for all the assistants in the entertainment industry that need to voice their woes. Other users can read, vote, and comment on how outlandish they think the story is.

Virtual Town Hall - MongoDB | Express | NodeJS | EJS | Passport - This app is for the use your local representatives and constituents. By moving the polling process from the town hall to online, you remove any need for cancelling a town hall or voicing your opinion. You can make a post as a representative to present your proposal and voice your opinion as a voter.

Ball is Life - JavaScript | jQuery | Canvas - A simple game where the player must jump over the obstacles that come towards them. In order to accomplish this I had to teach myself to use Canvas after only taking the course for two weeks.

ACCOMPLISHMENTS

ZipRecruiter.com Annual Hackathon - 1st Place in MVP Category

- "Binnacle" is a web app to help active job seekers stay organized. Built with **React** and **Foundation** in 32 hours
